

Guidelines for countermeasures against infectious diseases, including new coronas, during events

The Japanese Society for Turfgrass Science has established the following infection control measures for organized events.

1: holding a meeting

The event will be canceled in the Emergency Measures Area in light of the spread of infectious diseases.

2: Venue

1. For event venues and chartered transportation, select vendors that have published infection control measures.
2. No more than the maximum number of people will be admitted to the indoor venue.
3. We will set up the indoor venue with plenty of room to avoid crowding.

3: participant

1. Participants are expected to take care of their physical condition and participate remotely if they are not feeling well.
2. At indoor venues, participants will be informed to "wear a mask," "wash your hands thoroughly," and "avoid loud conversations" at the opening of the meeting and at the resumption of the meeting.
3. Participants will adhere to the venue's guidelines for new coronary infection control.

4: Infection Control at the 2025 International Turfgrass Research Conference Site
